INTERNATIONAL JOURNAL OF CLIMATOLOGY, VOL. 12, 887–891 (1992)

REFERENCE INDEX VOLUME 12 1992

1 Bakan, S. and Schwarz, E. (1992): Cellular convection over the North-Eastern Atlantic. 12: 353–367.

2 Bigg, G.R. (1992): Validation of trends in the surface wind field over the Mozambique channel. 12: 829–838.

3 Bitan, A. and Sa'aroni, H. (1992): The horizontal and vertical extension of the Persian Gulf pressure trough. 12: 733–747.

4 Bonell, M. and Sumner, G. (1992): Autumn and winter daily precipitation areas in Wales 1982–1983 to 1986–1987. 12: 77–102.

5 Burt, S. (1992): The exceptional hot spell of early August 1990 in the United Kingdom. 12: 547–567.

6 Clinet, S. and Martin, S. (1992): 700-hPa Geopotential height anomalies from a statistical analysis of the French Hemis data set. 12: 229–256.

7 Comrie, A.C. (1992): A procedure for removing the synoptic climate signal from environmental data. 12: 177–183.

8 Currie, R.G. and O'Brien, D.P. (1992): Deterministic signals in USA precipitation records : Part II. 12: 281–304.

9 D'Agostino, V. and Zenlenka, A. (1992): Supplementing solar radiation network data by co-kriging with satellite images. 12: 749–761.

10 Driscoll, D.M. and Fong, J.M.Y. (1992): Continentality : A basic climatic parameter re-examined. 12: 185–192.

11 Druyan, L.M. and Hastenrath, S. (1992): GCM simulation of the Sahel drought with alternative specification of observed SST. Short communication. 12: 521–526.

12 Dutton, E.G. (1992): A coherence between the QBO and the amplitude of the Mauna Loa atmospheric transmission annual cycle. 12: 383–396.

13 Evans, J.L. and Allan, R.J. (1992): El Nino/Southern Oscillation modification to the structure of the monsoon and tropical cyclone activity in the Australasian region. 12: 611–623.

14 Fang, J. (1992): Establishment of a data bank from records of climatic disasters and anomalies in ancient Chinese documents. 12: 499–519.

15 Fraedrich, K. and Muller, K. (1992): Climate anomalies in Europe associated with ENSO extremes. 12: 25–31.

16 Gibson, T.T. (1992): An observed poleward shift of the Southern Hemisphere subtropical wind maximum—A greenhouse symptom ?. 12: 637–640.

17 Giles, B.D. and Balafoutis, C.J. (1992): Cold windchill spells in the South Balkans: A study of the synoptic situations. 12: 305–312.

18 Gordon, A.H. (1992): Interhemispheric contrasts of mean global temperature anomalies. 12: 1–9.

19 Green, M.C., Myrup, L.O. and Flocchini, R.G. (1992): A method for classification of wind field patterns and its application to southern California. 12: 111–135.

20 Grimmond, C.S.B. (1992): The suburban energy balance: methodological considerations and results for a mid-latitude west coast city under winter and spring conditions. 12: 481–497.

21 Hulme, M. (1992): Rainfall changes in Africa: 1931–1960 to 1961–1990. 12: 685–699.

22 Ishikawa, N., Owens, I.F. and Sturman, A.P. (1992): Heat balance characteristics during fine periods on the lower parts of the Franz Josef glacier, South Westland, New Zealand. 12: 397–410.

23 Kane, R.P. (1992): Relationship between QBO's of stratospheric winds, ENSO variability and other atmospheric parameters. 12: 435–447.

24 Klein, W.H. and Bloom, H.J. (1992): Specification and prediction of monthly and seasonal precipitation amounts in California and Arizona river drainage basins. 12: 721–732.

25 Kozuchowski, K., Wibig, J. and Maheras, P. (1992): Connections between air temperature and precipitation and the geopotential height of the 500hPa level in a meridional cross-section in Europe. 12: 343–352.

26 Kulkarni, A., Kripalani, R.H. and Singh, S.V. (1992): Classification of summer monsoon rainfall patterns over India. 12: 269–280.

27 Kumar, K.R., Pant, G.B., Parthasarathy, B. and Sontakke, N. A. (1992): Spatial and subseasonal patterns of the long-term trends of Indian summer monsoon rainfall. 12: 257–268.

28 Lafleur, P.M., Rouse, W.R. and Carlson, D.W. (1992): Energy balance differences and hydrologic impacts across the northern treeline. 12: 193–203.

29 Lough, J.M. (1992): Variations of sea-surface temperatures off North-Eastern Australia and associations with rainfall in Queensland: 1956–1987. 12: 765–782.

30 Lyons, W.F. and Bonell, M. (1992): Daily meso-scale rainfall in the tropical wet/dry climate of the Townsville area, North-East Queensland during the 1988–1989 wet season: synoptic-scale airflow considerations. 12: 655–684.

31 Marengo, J.A. (1992): Interannual variability of surface climate in the Amazon basin. 12: 853–863.

32 Matarira, C.H. and Jury, M.R. (1992): Contrasting meteorological structure of intra-seasonal wet and dry spells in Zimbabwe. 12: 165–176.

33 McCabe, G.J. and Legates, D.R. (1992): General circulation model simulations of winter and summer sea-level pressures over North America. 12: 815–827.

34 McGregor, G.R. (1992): Temporal and spatial characteristics of coastal rainfall anomalies in Papua New Guinea and their relationship to the Southern Oscillation. 12: 449–468.

35 McInnes, K.L., Leslie, L.M. and McBride, J.L. (1992): Numerical simulation of cut-off lows on the Australian East coast: sensitivity to sea-surface temperature. 12: 783–795.

36 McKendry, I.G. and Lewthwaite, E.W.D. (1992): Summertime along-valley wind variations in the Wright Valley, Antarctica. 12: 587–596.

37 Milionis, A.E. and Davies, T.D. (1992): A five-year climatology of elevated inversions at Hemsby (UK). 12: 205–215.

38 Mitra, K. and Dutta, S.N. (1992): 18.6-Year luni-solar nodal and 10–11-year solar signals in rainfall in India. 12: 839–851.

39 Morassutti, M.P. (1992): Australian runoff scenarios from a runoff-climate model. 12: 797–813.

40 Nicholls, N. and Lavery, B. (1992): Australian rainfall trends during the twentieth century. 12: 153–163.

41 Oliver, H.R. (1992): Studies of surface energy balance of sloping terrain. 12: 55–68.

42 Omotosho, J.B. (1992): Long-range prediction of the onset and end of the rainy season in the West African Sahel. 12: 369–382.

43 Parker, D.E., Legg, T.P. and Folland, C.K. (1992): A new daily central England temperature series, 1772–1991. 12: 317–342.

44 Poje, D. (1992): Wind persistence in Croatia. 12: 569– 586.

45 Robinson, P.J. and Henderson, K.G. (1992): Precipitation events in the South-East United States of America. 12: 701–720.

46 Rotmans, J. and Den-Elzen, M.G.J. (1992): A model-based approach to the calculation of global warming potentials (GWP). 12: 865–874.

47 Rowson, D.R. and Colucci, S.J. (1992): Synoptic climatology of thermal low-pressure systems over South-Western North America. 12: 529–545.

48 Saavedra, N. and Foppiano, A.J. (1992): Monthly mean pressure model for Chile. 12: 469–480.

49 Schwarzmaier, G., Mayer, H. and Beyer, U. (1992): Climatological criteria for estimation of runoff by linear regression. 12: 103–110.

50 Selvam, A.M., Pethkar, J.S. and Kulkarni, M.K. (1992): Signatures of a universal spectrum for atmospheric interannual variability in rainfall time series over the Indian region. 12: 137–152.

51 Simmonds, I. and Lynch, A.H. (1992): The influence of pre- existing soil moisture content on Australian winter climate. 12: 33–54.

52 Simmonds, I., Rocha, A. and Walland, D. (1992): Consequences of winter tropical pressure anomalies in the Australian region. 12: 419–434.

53 Soule, P.T. (1992): Spatial patterns of drought frequency and duration in the contiguous USA based on multiple drought event definitions. 12: 11–24.

54 Stone, R. and Auliciems, A. (1992): SOI phase relationships with rainfall in Eastern Australia. 12: 625–636.

55 Subbaramayya, I. and Naidu, C.V. (1992): Spatial variations and trends in Indian monsoon rainfall. 12: 597–609.

56 Wheeler, D. and Martin-Vide, J. (1992): Rainfall characteristics of mainland Europe's most southerly stations. 12: 69–76.
